

KwixStart Implementation Plans

FOR DYNAMICS 365 BUSINESS CENTRAL

What is a KwixStart Implementation?

Some of the biggest fears for small businesses looking to implement their first ERP solution often revolve around cost and timeline.

- Will it go over budget?
- Will there be significant delays?
- How long before the system is functional?

For peace of mind during this overwhelming process, Kwixand Solutions offers Kwixstart implementation packages for Dynamics 365 Business Central, specifically geared towards small and budget-limited businesses.

A Kwixstart implementation is a lean implementation with a fixed price, so you can get your business up and running without losing transaction speed. Our lean implementation packages for Dynamics 365 Business Central include a discovery process, data import, the general ledger's configuration, accounts payable and accounts receivable, and training and support for Go Live.

As a Silver Dynamics 365 Business Central partner, Kwixand Solutions can help you go beyond the limits of entry-level accounting systems and transform your business.

With a KwixStart implementation plan, expect:

Guaranteed Results

If the results we agreed upon are not delivered, we recommend you pay us only what you believe our services were worth.

Fixed Fees & Timeline

Our lean implementation packages have fixed fees, so you don't worry about going over budget or overschedule.

Industry Expertise

Our experts have decades of ERP implementation experience across various industries and can guide your business.

+ Annual Support Plan

Enjoy peace of mind with Kwixand's tech support package which is tailored to meet your unique business needs. Get in touch for a custom quote.

Is a KwixStart Implementation Right for Your Company?

Lean, rapid implementations may not be right for every organization. This is especially true for larger companies, who have specific processes or compliance requirements, need customizations, or have many users. Lean implementations are ideal for smaller companies, which often fall within one of these criteria:

Small to mid-sized businesses

Businesses who require a solution for 1 location, ideally for up to 20 users.

First-time ERP adopters

Companies who are transitioning to an ERP solution for the first time.

Upgrading from accounting software

Companies who have outgrown their accounting software like Quickbooks or Sage.

Looking to constrain cost and risks

Smaller businesses with limited budgets and specific timelines.

Why Select D365 Business Central for Your SMB

As companies grow, they get to a tipping point where their current accounting or ERP systems can't keep up with demand, provide the insights needed to make informed decisions, or enable a mobile workforce.

Microsoft Dynamics 365 Business Central is a comprehensive solution that helps SMBs connect their financials, sales, services, and operations to streamline and secure business processes, improve customer interactions, and make better decisions.

Comprehensive integration.

Deploy one solution to manage your financials, sales, service, and operations with the ability to connect applications like payroll, banking apps, CRM systems, or custom APIs.

Connects your entire business.

Automatically pulls your systems and processes together so your people don't have to.

Fast from the start.

Delivers an easy-to-learn solution that people just intuitively know how to use.

Automates and secures business processes.

Improve productivity and get more done with easy-to-create workflows, audit trails, and enterprise-level security—features that basic accounting software can't provide.

Provide an end-to-end view of your business.

Centralize your data from accounting, sales, purchasing, inventory, and customer interactions to get an accurate end-to-end view of your business. All data stays up to date so you can spot trends, prevent issues, and deliver great customer experiences.

Trusted technology provider.

Creates security as a trusted, leading technology provider for businesses of all sizes around the world.

Enables mobility.

Empowers a mobile workforce by delivering the same experience across devices, regardless of their location.
